popdeurope: migrating sounds in and out of europe

popdeurope (the festival in berlin and the album) presents the latest sounds out of the big pulsating cities all over europe, where Hip-Hop, R`n`B, Downbeat, dancehall and house is mixed up with influence and traditions from outside Europe.

Starring German allround talent **Patrice** and dub-icon **Adrian Sherwood** as well as presenting some unreleased tracks by **Transglobal Underground**, **Weird MC** and **Lahcen The Moor (aka MoMo)**, **popdeurope** can certainly be considered a trendsetter for gobal beats of European origin.

Berlin, the festival's host city, is strongly and adequately represented by AfroBeat-fanatic **RAS**, featuring **Wunmi** and **Weird MC**. Two of Barcelonas hippest Crossover bands, namely **Ojos de Brujo** and **Dusminguet** are present, as well as **Anima Soundsystem** and **Dubcity Fanatikz** from Budapest, the HipHoppers **Da Weasel** from Lisbon, the acclaimed **Massilia Sound System** and **Fabulous Trobadors** from Southern France and last but not least "digital dervish" **Mercan Dede** from Istanbul/Montreal.

When **popdeurope** returns in 2004, we will continue to present interesting sound fusions out of European sound laboratories. And of course these experiments will result in new original and exclusive tracks the first of which, "**Beroliona**" by **Lahcen** an **Zoriya**, is featured on this year's compilation.
